Skills

Languages:

Java, Python, C, C++,
C#, JavaScript,
HTML/CSS, SQL, Rust

Databases:

MySQL, PostgreSQL,
MongoDB

Tools:

Git, SVN, Office 365,
Google Workspace,
Codex, Claude Code

Other:

IT/Technical Support

Education

Towson University
BS, Computer Science — Expected May 2027
GPA: 3.99/4.0
Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Object-Oriented Design/Programming, Web Development, Computer Networks, Programming Language Design/Implementation

Projects

SIMPLE COMPILER (LOLCODE COMPILER) [LINK]

Developed a compiler in Rust that translates a LOLCODE-inspired markup language into HTML. Implemented lexical analysis, parsing, and semantic analysis, with support for scoped variables and HTML code generation.

FULL-STACK FORUM APP (BOARD.) [LINK]

Developed a full-stack discussion platform using React, Express, Node.js, and MongoDB. Implemented user authentication, configurable topic boards, post voting and sorting, nested reply threads, and rich-text formatting for posts and replies.

FOOD DELIVERY SERVICE PROTOTYPE (FOODIE) [LINK]

Developed Java backend components and data access objects (DAOs) for a team-built food delivery prototype using MySQL and a Swing interface. Implemented database operations to persist and retrieve application data.

FULL-STACK WEATHER APP (PRACTIWEATHER) [LINK]

Developed a full-stack weather application using Django, PostgreSQL, and the OpenWeatherMap API. Implemented user accounts, saved cities, interactive map selection, and JavaScript updates that display weather without page reloads.
